Journal of Non-Crystalline Solids 115 (1989) ix–xii
North-Holland

CONTENTS

Editorial vii
Committees, sponsors viii
Contents ix

Section 1. ICAST inaugural lecture

Present and future applications of amorphous silicon and its alloys
Le Comber, P.G. 1

Section 2. Solar cells I

Solar cells: present status and future prospects
Catalano, A., R.R. Arya, B. Fieselmann, B. Goldstein, J. Newton, S. Wiedeman, M. Bennett and D.E. Carlson 14
Design considerations for low-band-gap a-SiGe : H alloy solar cells
Fortmann, C.M., S.S. Hegedus and W.A. Buchanan 21
Light-induced effects in a-Si/a-Si two-stacked tandem junction solar cells
Asaoka, K., M. Yamaguchi, H. Yamagishi, W.A. Nevin, H. Nishio, T. Endoh, K. Tsuge and Y. Tawada 24

Section 3. Thin-film technology I

Technical developments and trends in a-Si TFT-LCDs
Oana, Y. 27
Application of a-Si thin film diodes to active matrix LCD
Urabe, K., H. Fujisawa, M. Kamiyama, E. Tanabe and T. Yoshida 33
Amorphous silicon circuits for transient nematic liquid crystal image bars
Steemers, H., M. Hack, H. Tuan, V.J. Hull, H. Rommelmann, J. Stephany and A. Lakatos 36

Section 4. Poster session D

Photoconductivity of hydrogenated amorphous gap/crystalline GaP junction
Kubota, H. and M. Onuki 39
Cathodo and photoluminescence studies of non-stoichiometric amorphous silicon carbide and nitride
Alvarez, F., L.F. Castro, R.R. Koropecki, C. Sartori and G. Gordillo 42
Differences in the electrical properties of the interfaces of PECVD silicon nitride with amorphous and crystalline silicon
Habrard, M.C., M. Bensouda, J.C. Bruyere and D. Jousse 45
Improvement of the stability of amorphous silicon solar cells by light pulse treatment
Nevin, W.A., H. Yamagishi, K. Asaoka, M. Yamaguchi and Y. Tawada 48
Charge transport in halogenated amorphous $Se_{1-x}Te_x$ photoreceptor films
Kasap, S.O. and S. Yannacopoulos 51

Thermomechanical properties of amorphous semiconductor photoreceptor films of As_2Se_3
Yannacopoulos, S., V. Aiyah and S.O. Kasap 54
Simulation of spectral characteristics for a-Si solar cells
Pfleiderer, H. 57
Effect of δ-doped p-layer on the photovoltaic properties of a-Si solar cells
Yamanaka, S., Y. Kazama, K. Seki, K. Hiroshiro, M. Konagai and K. Takahashi 60
Metastable degradation of a–Si : H solar cells by 20 keV-electron irradiation
Schneider, U., B. Schröder and P. Lechner 63
Low temperature selective crystallization of amorphous silicon
Kakkad, R., G. Liu and S.J. Fonash 66

Section 5. Poster session E

Dependence of a-Si-H/Si_3N_4 interface properties on the deposition sequence in amorphous silicon thin film transistor produced by remote PECVD-process
Kim, S.S., G.N. Parsons, G.G. Fountain and G. Lucovsky 69
Modeling of the signal induced in a-Si : H particle detectors by protons
Pochet, T., J. Dubeau, L.A. Hamel, B. Equer and A. Karar 72
Hydrogen profiles of interfaces in amorphous silicon devices
Neitzert, H.C. and M. Briere 75
Ar^+ laser crystallization of a-Si : H film for active layer of TFT
Huang, X., Z. Li, Q. Gu, X. Boa and K. Chen 78
Impurity diffusion barrier for a-Si : H/SnO_2 system
Shiratsuki, Y., K. Kawabata, M. Sagawa, S. Miyazaki and M. Hirose 81
Photo-oxidation of amorphous silicon-carbon alloys and its use in field effect transistors
Wilson, J.I.B., A. Qayyum, S. Al-Sabbagh, M. Jubber and P. John 84
A study of electroluminescence in hydrogenated amorphous carbon films
Zhang, F., G. Chen, Y. Zhang and Y. Li 87
Integral thin film technology amorphous silicon image sensor
Sassaki, C.A., A.T. Arasaki, M.P. Carreño, A. Komazawa and I. Pereyra 90
High rate deposition of a-Si : H films for optoelectronic detectors by VHF-GD
Leutz, B., H. Keppner, V. Viret, D. Fischer, E. Sauvain and A. Shah 93
A three-terminal spatial light modulator optically addressed by an a-Si : H photosensor
Rice, R.A., G. Moddel, I. Abdulhalim and C.M. Walker 96
Optical nonlinearities in amorphous silicon-carbon alloys
Eicker, U., A.K. Darzi, B.S. Wherrett and J.I.B. Wilson 99

Section 6. Poster session F

Theory for field-effect mobility enhancement in multilayer structure thin-film transistors
Reita, C., L. Mariucci and G. Fortunato 102
Deposition of silicon by decomposition of silane via hydrogen abstraction
Brandt, M.S., J. Chrysostomides, S. Koynov and V. Petrova-Koch 105
Amorphous silicon static induction transistor
Meunier, M., M. Bisson and M. Kemp 108
Polarization charge in a-Si : H in alternating high fields
Fujikura, M., A. Sato, Y. Tsuruoka and K. Susa 111
Ambient-induced defect states at a-Si : H/ITO interfaces
Hoheisel, M., N. Brutscher and H. Wieczorek 114

Light-induced degradation of differently prepared heterojunction in a-Si pin solar cells
Kusian, W., K. Dietrich and F.H. Karg 117
Tunneling in vertical μc–Si/a–$Si_xC_yO_z$: H/μc –Si heterostructures
Fortunato, E., R. Martins, I. Ferreira, M. Santos, A. Maçarico and L. Guimarães 120
Transport properties of plasma-deposited amorphous silicon dioxide
Mariucci, L., G. Fortunato, P. Foglietti, C. Reita and D. Della Sala 123
Amorphous SiO_x : H alloy films as wide optical-gap materials
Haga, K., H. Miura, M. Kumano and H. Watanabe 126
Dry etched high resolution positive and negative inorganic photoresist
Hajto, E., R.E. Belford, P.J.S. Ewen and A.E. Owen 129

Section 7. Thin-film technology II

Printing applications of a-Si thin film transistors
Tuan, H.C. 132
Threshold voltage instability of a-Si : H TFTs in liquid crystal displays
Ibaraki, N., M. Kigoshi, K. Fukuda and J. Kobayashi 138
Metastable changes in the output characteristics of high-voltage amorphous silicon thin-film transistors
Shaw, J.G., M. Hack and R.A. Martin 141
Low-voltage operation a-Si : H thin film transistors with very thin PECVD a-SiO_2 gate dielectric
Fortunato, G., L. Mariucci, C. Reita and P. Foglietti 144
Low temperature fabrication of poly-Si TFT by laser induced crystallization of a-Si
Masumo, K., M. Kunigita, S. Takafuji and M. Yuki 147

Section 8. Thin-film technology III

Simulations and physics of amorphous silicon thin-film transistors
Hack, M., J.G. Shaw and M. Shur 150
Capacitance voltage studies of hydrogenated amorphous silicon thin film transistors
Hepburn, A.R., C. Pickup, J.M. Marshall, W.I. Milne and F. Clough 156
DLTS study of defect creation in amorphous-silicon thin-film transistors
Nickel, N., W. Fuhs and H. Mell 159

Section 9. Modulators, memories and detectors

Optically addressed electroclinic liquid crystal spatial light modulator with an a-Si : H photodiode
Abdulhalim, I., G. Moddel, K.M. Johnson and C.M. Walker 162
Amorphous silicon nitride optical grating beam splitters
Taghizadeh, M.R., J.I.B. Wilson, J. Turunen, A. Vasara and J. Westerholm 165
Amorphous silicon analogue memory devices
Rose, M.J., J. Hajto, P.G. LeComber, S.M. Gage, W.K. Choi, A.J. Snell and A.E. Owen 168
Anomalous high zero bias resistance in metal– amorphous silicon–metal structures
Gage, S.M., J. Hajto, S. Reynolds, W.K. Choi, M.J. Rose, P.G. LeComber, A.J. Snell and A.E. Owen 171
Applications of a-Si : H radiation detectors
Fujieda, I., G. Cho, S.N. Kaplan, V. Perez-Mendez, S. Qureshi and R.A. Street 174
a-Si : H p-i-n junctions as ionizing particle detectors
Aglietti, U., C. Bacci, F. Evangelisti, M. Falconieri, P. Fiorini, F. Meddi, A. Mittiga and G. Salvini 177

Section 10. LEDs and sensors

Blue light emission from a-C : H by thin film electroluminescence structure cell
Hamakawa, Y., T. Toyama and H. Okamoto 180
Methodology in design of a page width a-Si TFT linear image sensor
Nishihara, Y., M. Nobue, T. Abe, H. Miyake, H. Ito, T. Ozawa and T. Hamano 183
Amorphous silicon–germanium diodes for optical detection
Deimel, P.P., B. Heimhofer, G. Krötz, G. Müller and J. Wind 186

Section 11. Solar Cells II

Unique a-Si solar cells and advanced PV systems
Kuwano, Y. and M. Isomura 189
Characterization of boron-doped μc-SiC/c-Si heterojunction solar cells
Han, M.-K., Y. Matsumoto, G. Hirata, H. Okamoto and Y. Hamakawa 195
Effects of the surface morphology of transparent electrode on film deposition and photovoltaic performance of a-Si : H solar cells
Sakai, H., T. Yoshida, S. Fujikake, Y. Ichikawa, A. Ueda, O. Ishiwata and M. Nagano 198
High-efficiency amorphous silicon p-i-n solar cells deposited from disilane at rates up to 2 nm/s using VHF discharges
Chatham, H., P. Bhat, A. Benson and C. Matovich 201
SnO_2 reduction by hydrogen bombardment and its effect on SnO_2/a-Si interfaces
Giannetti, C., C. Coluzza, A. Frova, M. Fanfoni, M. Capozi, C. Quaresima and P. Perfetti 204

Section 12. Photoreceptors

Fabrication of a-Si : H electrophotographic photoreceptors by magnetron plasma CVD method
Wakagi, M., K. Tamahashi and M. Hanazono 207
Field effect in SiN_x-overcoated amorphous silicon photoreceptors observed by xerographic discharge method
Yagi, S., M. Nishikawa and K.-I. Karakida 210
Effect of doping on carrier range in a-Si : H-xerographic studies
Pai, D.M. and M. Abkowitz 213
Deep trapping and recombination in a-Se : As X-ray sensitive photoreceptors
Schiebel, U., T. Buchkremer, G. Frings and P. Quadflieg 216
